

OUR IMPACT

Problem

In Germany, the socio-economic background of children & young people determines their educational success. A state of affairs that is neither fair nor uses the diverse potential of our diverse society to meet the challenges of the present and future.

Approach

To achieve equal opportunities for children and young people, we strategically and pragmatically support non-profit organisations with the same mission. This allows our partner organisations to maximise their impact with their expertise in designing and implementing projects and reach more children and families.

Input

We provide our partner organisations with the resources they need, from networking with other cooperation partners, to practical support, to the allocation of financial resources.

Output

Through an efficient use of resources, identified challenges of our partner organisations are addressed and they expand and/or improve their services.

More children & young people are reached by a high quality service

Outcome

Children & young people develop the competences they need for a successful educational biography & are accompanied by their parents and educational institutions in the best possible way.

Impact

Unequal starting conditions are balanced out in the best possible way - so that all children and young people have the same opportunities!
